

LOWER PRIMARY GAMES 2023

Hops and Skips, Hold and Slide, Carry and Side Steps, Bounce and Kick.

For a first-time Parent Volunteer this meant being among very excitable and joyful lower primary girls who were waiting for the sound of the whistle to commence the games.

With such high level of energy at the different game stations, the adults really can't help but cheer, smile, laugh along with the boisterous cheering of the girls.

It was awesome to also see Parent Volunteers in action with the game demos, and a little bit of animation that got the girls excited and giggly.

A wonderful, fun-filled experience that allowed a warm fellowship among the adults. If there are any tips to go by, the adults need to arm themselves with soothing lozenges (from the active use of our voices for cheering and laughter), a couple of simple stretches to feel younger with the young ones and to see the smile on your loved ones and to reward yourself with a giant-sized ice cold drink after all the excitement and activities.

As parents we need a little break from our busy daily lives, make time for the ones that we love, live for the now and taking in every beautiful moment with the time spend together as a family.
